

HONEYWELL HF ACID OFFLOADING AUDITS

Honeywell is dedicated to the safe production and transportation of hydrofluoric acid (HF).

We collaborate with our customers to ensure that HF deliveries and offloads are done safely and efficiently according to Standard Operating Procedures (SOPs).

Honeywell

A MUTUAL EVALUATION OF HF OFFLOADING PROCEDURES

An HF offloading audit is a mutual, on-site process check of Honeywell and customer offloading SOPs to identify improvement opportunities. Our customer's offloading SOPs are reviewed for compatibility with Honeywell guidelines.

Offloading audits are normally unannounced to better enable observation of a natural work process. Honeywell HF drivers and customer operators are observed to ensure compliance.

A comprehensive checklist is used to review each critical step in the offloading activity.

The documents reference:

- Honeywell SOPs
- Hydrogen Fluoride Industry Practices Institute (HFIIPI) Cargo Tank Trailer Unloading Guidelines
- American Petroleum Institute (API) RP 751

A post-offload debrief is held with Honeywell HF drivers and customers to review any observations/findings and agree on improvement opportunities.

LEARN MORE

To discuss the benefits of an HF offloading audit or to schedule it, contact your Honeywell Account Manager or HF Technical Services Manager. To register for HF training courses or online seminars, visit:
